

## Export from *TimeTabler* to *WCBS PASS/3Sys/HUBmis*: Supplementary Questions

---

**Question-1:** PASS does not seem to like the ‘B’reak and ‘L’unch markers in my export file.

**Answer:** One school reported this, and the solution was to manually delete the “B,” and “L,” from the export file, before importing the file into PASS.

---

**Question-2:** Should I make the “Long TGN” the same as the “Short TGN”, when setting-up my Teaching Group Names (TGN) (eg: at Step 5 of the export) ?

**Answer:** One school reported that this was necessary for their copy of PASS to import.

---

**Question-3:** Which of the three “*Export to WCBS*” options should I choose ?

-  WCBS HUBmis
-  WCBS PASS / 3Sys
-  WCBS PASS (2008 & earlier)

**Answer:** If you have the latest HUBmis MIS, then choose the top option. Otherwise, choose the second option. Few schools require the bottom option these days.
